FOCUS STATION®

Feeling More Rested

Thank you for purchasing the Focus Station®. The Focus Station® is a light and easy to transport all-in-one tower. This has been specially developed to support and preserve the natural energy of your office, hotel room, holiday home and of course your own home. In our products we make smart use of the available electromagnetic fields (EMF) as a source of energy to create a field with frequencies that are also found in nature. This new field is more organic - "organic" in nature and more attuned to you. If you put the Focus Station® in your environment, you will feel better in a wireless environment. In addition, you can take full advantage of your devices throughout the day, while supporting your vitality.

Sustainable

No batteries or other resources are required to use a Focus Station. Users confirm that Focus Stations promotes the maintenance of rest and vitality in the body. Users often notice an increase in their energy as soon as they start using a Focus® product.

Product specifications Focus Station®

Size : 20cm x 20cm x 41cm

Weight: 1.3kg

Material: Recyclable thermoplastic

Color: Anthracite Grey

Reach of the Focus Station®

The Focus Station® has a range of approximately 12 metres.

Instructions for use of the Focus Station®

- You place the Focus Station® at a distance of 2 to 6 meters from your workplace, hotel bed, camp bed or the place in your house where you often go. You can also place it in the living room or on the floor where your children sleep. You can also use multiple Focus Stations® for larger surfaces.
- Some people are more sensitive than others. Choose the distance of the Focus Station® that suits you.

The Focus® Technology is based on three principles:

- 1) *Energy Harvesting* – Just like solar panels, Focus products make smart use of already present electromagnetic fields (EMF). As a result, Focus does not need batteries or electricity. Another advantage of Focus is that as the electromagnetic field increases in strength, the natural field increases proportionally.
- 2) *Biomimicry* – The science of Biomimicry strives to mimic the intelligence of nature in the design and development of products, systems and processes. In this way Focus imitates nature at the level of electromagnetism. Your phone then becomes a source of natural energy and is more attuned to you.
- 3) *Making tech organic* - We make Tech Organic by combining *Energy Harvesting* with *Biomimicry*. People, animals and plants function better in nature. In our Focus products we have combined technology (patented electrical applications) with organic frequencies such as the Schumann frequencies. This way you can enjoy your laptop, mobile and other technological developments more.

In the production and packaging of Focus® products, environmentally and people-friendly materials are used as much as possible.

Withdrawal symptoms

If you have not used Focus® products before and are just starting to use the Focus Station®, you may experience withdrawal symptoms, such as a mild headache and/or nausea. To prevent possible withdrawal symptoms, we recommend drinking enough (spring) water for the first two weeks: adults at least 1.5 liters per day, children over 12 years one liter and children up to 12 years half a liter per day. If withdrawal symptoms have not subsided after one or two weeks, you can always contact us via info@lifeislove.com or via the therapist through whom you purchased the Focus® product.
